

this time. I hope that is not the case but I will be surprised. My only point is that before we expand, and that is what this does however limited it may be, before we start expanding the services and however deserved it may be, I think we ought to be looking at the whole picture at one time and not add another ingredient. It makes it additionally difficult to work through or it may make it additionally difficult to work through some reasonable basis on which to act. I am sure many of you, at least I have been told incidents many times by school board members of the use of special ed money that troubles them, and I haven't stood up and argued those or repeated them particularly but I do know that there are problems out there that at least a better method of supervision, of accounting, of audit review at a minimum would help, and we haven't even been able to do that. So I would just urge you to consider bracketing the bill so this whole issue can be dealt with after the Education Committee has viewed the whole program in total. I am not particularly advocating the dollar cap. I am inclined to agree that that certainly is not the most desirable way to go. It may be the only way that we have available at the moment in the absence of anything else. But I would urge that the bill be bracketed for one more year so the whole issue can be treated at one time and not continued to be treated in pieces which up-to-date at least has not been successful.
